# Printed ribbon by
# Fibre Mood

✱✱✱✱✱

**Personalise your skirt, trousers, sweater or bag with ribbons with a personal message. We pimped the <u>Stella top</u> with white ribbon featuring a black text.**

## supplies

- Cotton ribbon (3 cm wide)
- Textile paint
- Sponge or foam paintbrush
- Stencil paper or thin cardboard/plastic
- Hobby knife or cutter

## sewing instructions

### 1

Download one of our stencils on the website www.fibremood.com or make your own design. If you make your own design, make sure the letters are smaller than the width of the ribbon.

### 2

Print your design and trace it onto the stencil paper or thin cardboard or plastic. Cut out the design using a hobby knife.

If you have a stencil cutter then you can cut out your design directly from the stencil paper.

### 3

Put a small amount of textile paint on the sponge and wipe off any excess so that you only have a little bit of paint on your sponge

Place your stencil on the cotton ribbon and dab with your sponge over all the letters on your stencil. If you have too much paint on your sponge the letters will run.

Remove the stencil from the ribbon and allow it to dry. Repeat this step until your ribbon is full.

### 4

After step 3 of the method for the Stella top, you place the ribbon with the right side up against the dart in the front panel. Stitch it in place at 2 mm from the edge.

Fold a piece of the ribbon double with the right sides on the outside so you get a loop. Place the unfinished edges on the V nick of the neckline on the front panel.

Now continue with step 4 of the method to make the Stella top.
